INKS AND TONERS

What is the difference between Inkjet + Laser printing?

Selling features for Inkjet Printing

- Shoots faster drying ink through tiny nozzles onto a page to form characters.
- Inkjet printers are fast, affordable and quiet.
- Inkjet printers provide high quality graphics and colour printing.
- A printhead is intergrated into the inkjet cartridge so the ink and inkjet technology work together.

Market to sell inkjet printers

- Home, small to medium size businesses (SMB), found on the desk in many offices.

Selling features for Laser printing

- Uses static electricity and heat to bond particles of toner to a page to create characters.

Market to sell laser printing

- The entry level is for home + SMB.
- Large corporations allowing for networking,
- eprint (means you can print from anywhere in the world)

HP Inks and Toners come in small, standard and XL, so there is always more then one packaging option.
(NEVER LOOSE AN ORDER)

Remember even though the initial outlay is more for HIGHER YIELD cartridges, the COST PER PAGE becomes cheper, the higher the yield.

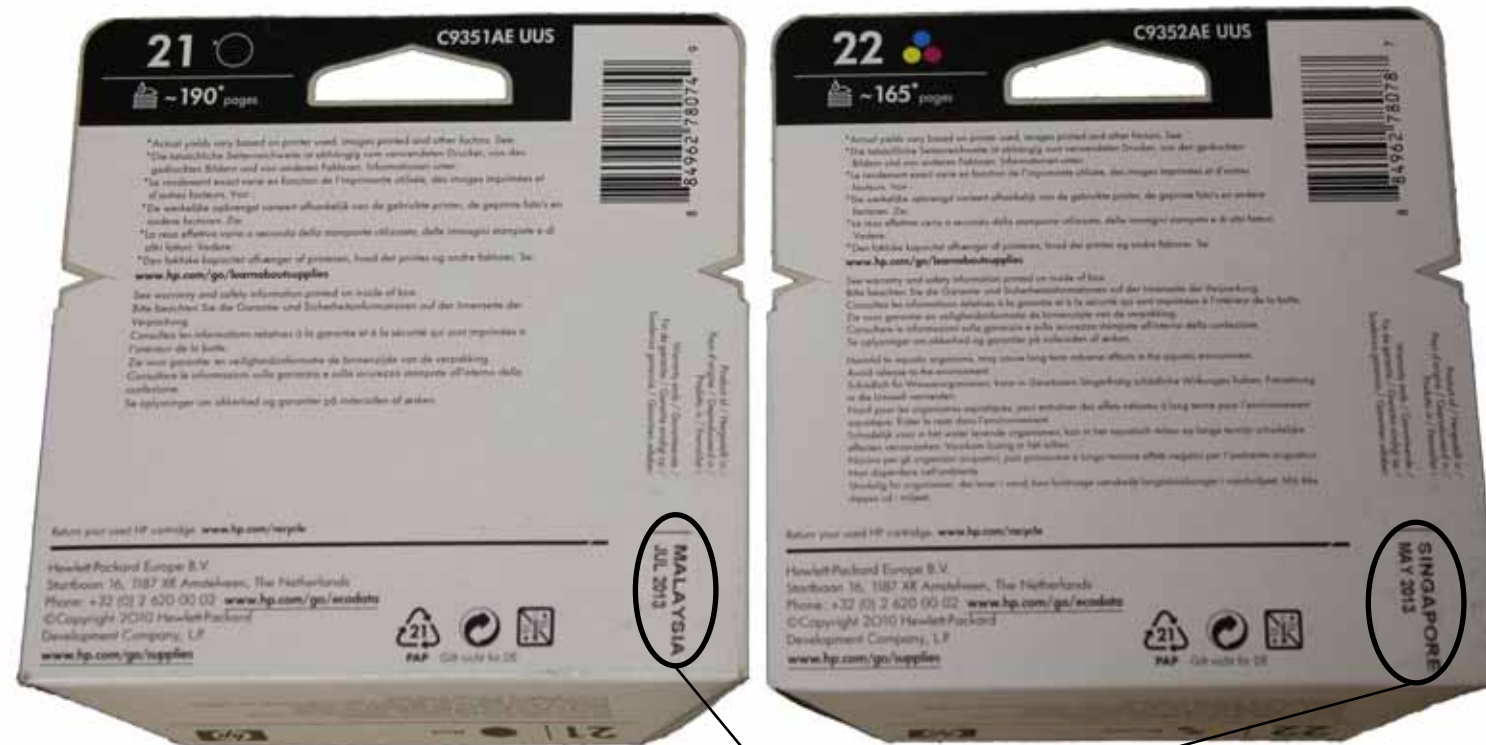

HP also offer DUAL & TWIN PACKS where there is approximate 15% saving when buying two cartridges

CMYK - an acronym used to describe cyan, magenta, yellow and black which are the basic colourants used in colour printing. These four colours are used to create all colours in an image, photo printers add additional colours for improved photo quality printing.

What does the expiry date mean and will it make my HP ink supplies stop working?

Most HP ink supplies do not have ink expiry date, but rather a warranty end date. This means that the cartridge will still work in the machine but will not be replaced out of that warranty date

This is the expiry date on the HP ink cartridge packaging

Anti Counterfeit information

DEMO COUNTERFEIT

What are counterfeit print cartridges and why should I care?

What is a counterfeit print cartridge?

Counterfeit print cartridges are mainly refilled or remanufactured print cartridges packed in unauthorised or fake reproductions of HP packaging. They are meant to mislead the consumer into believing that they are genuine HP products, which they are not.

Why should I care?

Although counterfeit print cartridges may look like genuine HP print cartridges, they don't provide you with the high quality, proven reliability and consistent yields you have come to expect from HP.

The potential risks of using counterfeit print cartridges include poor quality-outs, reduced page yields, print cartridges which fail prematurely or do not work at all, printer damage may require repair, interruption of printing infrastructure and workflow, as well as potential invalidation of hardware warranties.

Poor or inconsistent print quality is a primary indicator of non-original products.

LARGE FORMAT INKS AND MEDIA

Large format printing is designed to handle paper sizes of 11 x 17" or larger.

Large format printers use continuous rolls of paper. These printers are designed to produce photo quality posters, blue prints, maps, banners and signs.

This is a very specialized market and HP drive it through a handful of highly qualified specialist dealers.

Description

HP 10bII+ Financial Calculator
(Algebraic) - non Programmable

Short Specifications

All-Purpose Financial Calculator

- Calculate loans, TVM, NPV and IRR
- Robust set of statistical, algebraic, and trigonometric functions
- Approved for CFP®, FRM and ERM Exams

Catalogue Description

A smart choice for professionals and students, the fast and powerful HP 10bII+ Financial Calculator makes it easy to solve business, financial, statistical, and math calculations accurately and quickly, at a price that everyone can afford. The easy-to-learn and use design packs plenty of features to make your work less complicated. Perfect for students, the HP 10bII+ is the first calculator in its class with probability distributions functions, a topic required in many introductory statistics classes. Meets exam requirements for many standardized exams.

HP 10S - Scientific calculator
(Algebraic) - non Programmable

Short Specifications

Easy to use for science and math students

- 2-line display
- Solar-Powered with battery backup
- Work with fractions, logs, powers and roots

Catalogue Description

Combine value, higher-math power and sleek convenience into one stylish package and you get the HP 30s. Ideal for General Math, Pre-Algebra, Algebra, Trigonometry, Statistics, Geometry, Biology, Chemistry, Physics, Earth Sciences and more. With a 2-line display, over 250 functions and 10 memory registers, it's great for today's discerning math and science students.

HP 12c Platinum Financial Calculator (Algebraic or RPN)

Short Specifications

- Enhanced for professionals and students
- RPN2 and standard algebraic calculation modes
 - Calculate loans, TVM, NPV, IRR, bonds, depreciation and more
 - Keystroke programming (up to 399 steps)
 - Approved for CFA®, CFP® and ERM and FRM™ exams

Catalogue Description

Demanding financial professionals enjoy the HP 12c Platinum that is up to 6 times faster with 4 times the memory of the original HP 12c. Choose efficient RPN1 or algebraic entry-system logic. Take keystroke programming up to 399 steps and utilize over 130 built-in functions. “Undo” and “Backspace” buttons improve ease of use. Calculate TVM, loan payments, interest rates, standard deviation and more. Permitted for use on Certified Financial Planner® (CFP), Chartered Financial Analyst® (CFA), and Global Association of Risk Professionals® Financial Risk Management® (GARP FRM™) exam.2

HP 17bII+ Financial Calculator (Algebraic or RPN) - HP Solve

Short Specifications

- The ultimate financial calculator
- Dynamic menu for easy navigation
 - RPN2 and standard algebraic calculation modes
 - HP Solve4 Equation solver
 - Approved for CFP® certification exam

Catalogue Description

The simple-to-use HP 17bII+ financial calculator is built for the heaviest workloads of real estate, finance and business professionals. Quickly calculate loan payments, interest rates and conversions, standard deviation, percent, TVM, NPV, IRR, cash flows, bonds and more. Features 28KB of user memory, over 250 menu-driven functions, RPN1 and algebraic entry-system logic, clock, calendar, HP solve application2, menu prompts and messages. Permitted for use on Certified Financial Planner® (CFP) Certification Exam3

HP 50g Graphing Calculator - (Algebraic or RPN) - Programmable

Short Specifications

Great for engineering and advanced math

- View solutions in 2- or 3-D graphics
- SD card slot for expanded memory and data transfer
- RPN2, textbook and standard algebraic calculation modes
- Advanced Computer Algebra System (CAS)
- HP Solve4 and HP Equation-Writer

Catalogue Description

Put HP's ultimate graphing calculator to use. Perfect for surveying, engineering, math and science professionals and students. Make use of a powerful SD card slot. Work how you like with RPN4, Textbook and algebraic entry-system logic. Enjoy lots of usable space on the largest, high-contrast screen. Utilize USB and serial connectivity, HP Solve5, structured programming and Computer Algebra System (CAS).

DATA STORAGE

Data storage is used by companies to manage their data securely by backing up their information. This allows companies to manage, store and secure data for network and data centre environment. This is a very specific market and wouldn't be sold in a retail environment. As the technology develops it becomes faster and larger in capacity.

Data Storage benefits

- Cost effective solution
- Reliable and Durable
- High performance

The product line up includes:

- DDS/DAT

- DLT/SDLT

- LTO Ultrium - most popular

- RDX

Data is usually driven through the IT managers.

Should you wish to increase your sales on Data media visit the IT managers with the following questionnaire

Questions to ask when selling Data Media.

What systems do you back up on?

What media do these systems use?

Do you prefer any particular brand?

Does price play an important role in your decision?

What quantity do you use?

MEDIA

HP papers are designed with the environment in mind. We source our papers from suppliers that use pulp from renewable forests which are managed responsibly and certified by an independent third-party certification body, such as the Forest Stewardship Council (FSC®), the Programme for the Endorsement of Forest Certification (PEFC), or the Sustainable Forestry Initiative, Inc. (SFI®). Look for the forestry certification logo on packaging.

HP Inkjet Printer Media

HP's coated inkjet papers are engineered with swellable or porous coatings that provide the highest quality document reproduction. When you print using HP inks and paper, you get documents that deliver a professional look and feel.

HP Laser Printer Media

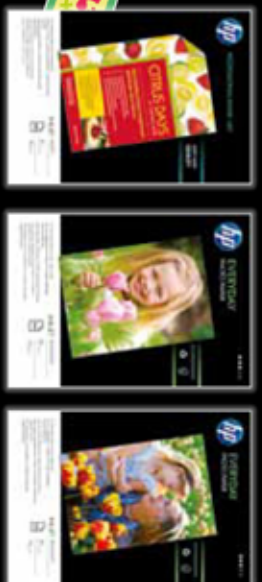

Choosing the right laser paper for different uses makes good sense. It allows you to be economical on your everyday jobs and to highlight your communication to important ones. HP laser papers are engineered to have a super smooth texture and in some cases a special coating for when you want our images to all but leap off the page.

HP Photo Paper

HP's easy to use photo papers resist fading are quick drying and smudge proof and their thickness and weight provide a superior look and feel. With a variety of sizes to choose from, you can get photo quality prints for any projects.

HP PARTNER PROGRAMMES

SCRP

Supplies Contract Reseller Programme

- SCRCP is a programme to enable the reseller to address the pay per use contract business by giving Resellers upfront discount pricing on Hardware and Consumables, thereby making them more competitive in the marketplace and enabling them to capture marketshare.
- This programme encompasses hardware and consumables, it is a complete solution and marketed as such. The programme can be entered into once there is guarantee placement of hardware devices and supplies together.

Planet Partners

- This programme has been introduced to combat the refill market space. Once the customers have used their cartridges, this programme enables them to collect the empty cartridges, place them safely in boxes and return them back to HP for a refund. Once they are returned to HP, they are recycled and HP then makes printer parts with the recycled material and assembles the printers.

Win Back / CSP

Exclusively for Compatibles

- This programme has been introduced to combat the increased marketshare of the compatible market. When an end user is identified by the reseller, HP and the reseller negotiate an attractive offering for that end user to hinder the demand for compatible cartridges, in turn not jeopardising the warranty etc of the HP printer. The discount is given upfront and the Distributor claims the monies from HP at month end.

CBDS

Channel Bid Deal Supplies

- This is the volume driven programme that is valid for 6 months with a reseller and an end user, and is utilised to secure ongoing business, remaining competitively priced, and an excellent avenue to acquire new business. It contains both Inks and Toners. Based on the contract, HP will allocate discount per line item and this in turn is passed on to the reseller. The discount is given upfront and claimed at month end by the Distributor.

CSP

Corporate Supplies Programme

- This programme is done from HP direct to the reseller. An end user is identified and together the reseller and end user negotiate for the discount. This enables smaller resellers an opportunity to position themselves with end users and have an attractive offering. The Distributor sells the items to the reseller at normal price and the reseller claims the monies direct from HP.
